

## Press Release

May 2026

## Discover Schleswig-Holstein!

High up in the north of Germany, on the border with Denmark, lies the self-proclaimed "most beautiful federal state in the world": Schleswig-Holstein, hemmed in by the rough North Sea on one side and the gentler Baltic Sea on the other. The green land between the coasts is flat and fertile. The wind here is simply everywhere, sometimes just a little bit, a gentle breeze, sometimes a fresh gust and often a full-on storm. The wind ensures that it never gets too warm and is ideal for taking a deep breath and clearing your head.
